

Designergate Prisma

Innovative illuminating plexiglass antennas

RADIO
FREQUENCY
TECHNOLOGY

Designergate Prisma can be lit in whichever colour you choose. When the alarm is triggered, both antennas flash red and then return to their preset colour once the alarm has stopped. The length and pattern of the alarm is fully configurable.

As a radio frequency (RF) system with a wide detection range, Designergate Prisma antennas can be placed further apart than other antennas, making them a great choice for shops with large entrances or

wide aisles. Each antenna has a very narrow footprint, which helps to save space and leaves more room for the customer.

Designergate Prisma is one of the most modern alarm systems on the market and thanks to its transparency and elegant design, blends well into any store. Retailers can also customise the Designergate Prisma by having their store logo etched into the clear plexiglass surface of the antenna.

ABOUT RF TECHNOLOGY

Radio frequency (RF) technology has been used for many years to combat shoplifting and is an ideal solution for clothing retailers, department stores and supermarkets.

RF technology uses fire-resistant, tamper-proof hard tags and re-useable or adhesive labels, all of which are simple to deactivate. Certain RF antennas can be fitted with a metal detector to pinpoint individuals carrying aluminium-lined bags.

Gateway is a supplier of anti-theft systems for the retail sector worldwide. We are the only company to develop, manufacture and market solutions built on every existing form of Electronic Article Surveillance (EAS) technology. This encompasses RF, AM, EM and even the unique RM, a combination of RF and EM technology.

Features

- Antenna can be lit in colour of your choice
- Both antennas flash red when alarm is triggered
- Length and pattern of alarm configurable
- Antenna can be etched with store logo
- Compatible with Gatenet software
- Works using radio frequency (RF) technology
- Discreet and elegant design
- Narrow footprint to save valuable entrance space
- Suitable for wide aisles and entrances

Specifications

Article number 3075-prisma
Width 405mm
Height 1576mm
Thickness 20mm
Standard frequency 8.2MHz

Maximum Detection Range

Galaxy Midi 2.20m
Galaxy Midi Ink 2.20m
Galaxy Mini 1.70m
Mini Square 1.90m
Paper Label (40x40mm) 1.60m

RF hard tags are fire-resistant and sealed with super-strong magnets to prevent tampering. They also have smooth needles to avoid damage to clothes and other products.
